Nutflix!

Nutflix is a movie web application built using React, Bootstrap, React-Redux, and Redux Toolkit. This application allows users to browse and discover movies and TV shows. To access movie data, Nutflix uses the TMDb (The Movie Database) API, and to maintain security and flexibility, the API key is stored in a .env file as VITE_APP_TMDB_API_KEY. This README provides instructions on how to set up and run the Nutflix MovieWebApp locally.
